Overview

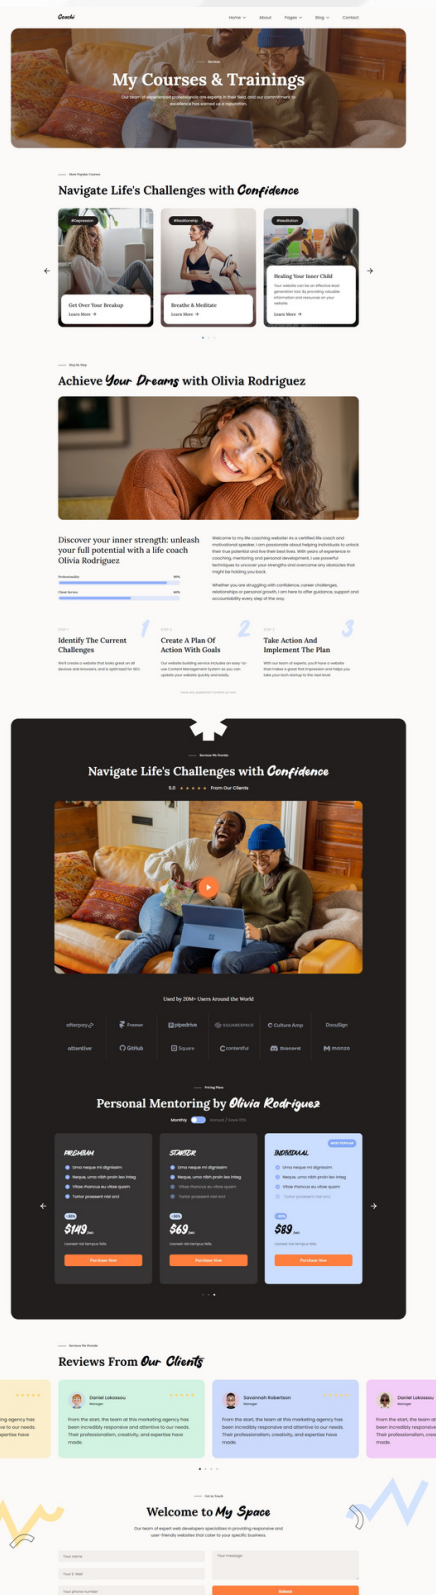

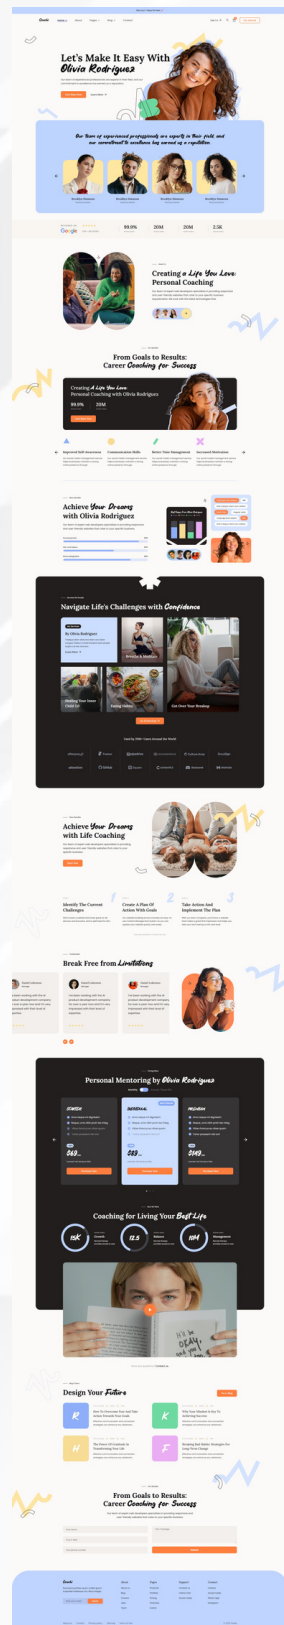

Are you new to PHP or need a refresher? Then this course will help you get all the fundamentals of Procedural PHP, Object Oriented PHP (OOP) and using the course by building a CMS system similar to WordPress, Joomla or Drupal. **Knowing PHP has allowed me to make enough money to stay home and make courses like this and for students all over the world.** Going to PHP developer can allow anyone to make really good money online and offline. Involving dynamic applications knowing PHP will allow you to build web applications, websites or Content Management systems, like WordPress, Facebook, Twitter or even Google. **There is no limit to what you can do with this knowledge.** PHP is one of the most important web programming languages to learn, and knowing it will give you **SUPER POWERS** in the web development world and job market place. **Why?** Because Millions of websites and applications (the majority) use PHP. You can find a job anywhere or even work on your own, online and/or offline like freelancer or Online. You can definitely make a substantial income once you learn it. **It will not bore you!** I take my courses very seriously but at the same time try to make it fun about topics how difficult learning been an instructor with a monotone voice or boring attitude is. This course is fun and when you need some energy to keep going you will get it from me. **My Approach** practice practice and more practice. Every section inside this course has a practice lecture at the end, reinforcing everything with some code in the lectures. I also created a small application for you will be able to download to help you practice PHP. To top it off, we will build and awesome CMS like WordPress, Joomla or Drupal.
